*24W of Power for 6 Hours

*Versatile mount for Solar Panels

*Single-Axis tracker for optimal angle of exposure

*2 Outlets to connect your laptop and other appliances

Energy Acquire is a solution to providing Solar Energy through providing a means of charging a portable Lithium Ion Battery that may be docked to a discharge station for use with home appliance.

The Panel Rack / Solar Tracking

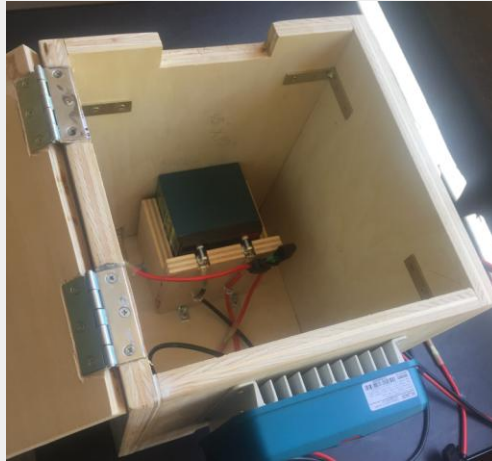

The panel rack is designed to improve access to sunlight, and use negative space to keep your balcony uncluttered.

Solar tracking improves the intensity of sunlight gathered through the day by **33%**

The Charging Station

A wooden box including a charge controller, a battery and some fixed cable connections for users convenience.
